Work Teams

Interested in the possibility of hosting work teams? Good choice! Engaging volunteers from other communities can be a truly enriching experience for all involved – Partner families, staff, volunteers, neighbors and the larger community. It offers everyone the opportunity to put their faith into action to minister to God's children in need.

The documents you will find in this section of the Operations Manual will offer guidance as you begin to structure your work team program. Each document is formatted to be easily adjustable to your specific program needs. You may find some to be applicable as they are and others to need some changes. Please adapt the documents as needed – and share them with us if you feel the changes you make would benefit other Covenant Partners.

While you may find volunteers in your own community to fill your construction needs, you may want to offer your community as a place for volunteers to travel to for a fulfilling period of service. Many of the following work team documents may be used for local volunteers as well as visiting volunteers.

It is helpful to have a plan as you proceed with forming a work team program, and we have experienced staff to help you begin. Please contact Ryan Iafigliola at ryani@fullercenter.org for assistance establishing your Covenant Partner as a work team host.

Blessings to you as you begin this wonderful journey!
